AMENDMENTS TO THE SPECIFICATION**In the Specification:**

- (1) On page 1 at line 1, please amend the specification as follows:

Title: SYSTEM AND METHOD FACILITATING UNIFIED FRAMEWORK FOR
STRUCTURED/UNSTRUCTURED DATA

- (2) On page 5 at line 18, please amend the specification as follows:

Yet another aspect of the invention relates to a data packet adapted to be transmitted between two or more computer processes. One or more first data fields associated with the data packet are adapted to store a hierarchical representation of information associated with a source document. One or more second data fields are adapted to store mapping instructions relating to mapping the hierarchical representation of information to a relational representation of the source document.
